WATER RIGHTS
SALT LAKE

SUBJECT: ECHO RESERVOIR WATER RELEASES

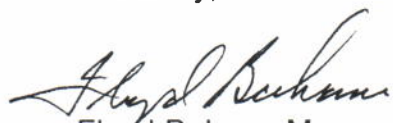

Dear Blaine,

The Weber River Water Users Association requests that you contact our office prior to your releasing any Association stockholders' storage water from Echo Reservoir. We would like to know which stockholders are calling for their storage water before it is delivered.

On May 7, 2001, our dam tender was asked to release 25 c.f.s. of water for "the river". As you are aware, the Association is not responsible to release any water for the river—it must be released for a stockholder. In your discussion with our dam tender, it was not clear which stockholder ordered the water.

Please do not hesitate to call our office if you have any questions or wish to discuss this request.

Sincerely,

Floyd Baham, Manager
